

# Debouncing

## Problem Name

Jumanji

## Problem Statement

Write the code for dynamic searching of an element of the input array provided and implement the concept of debouncing while doing so.

## Purpose of the Assignment

To learn how to implement debouncing

## Details

- Create a search bar to enter input and display output as given below.
- Write a code to implement search by author name and implement debouncing upto 3s.
- Example:

Input = Mar

Output =>

Isbn : 9781593275846

Title: Eloquent JavaScript, Second Edition

Subtitle: A Modern Introduction to Programming

Author: Marijn Haverbeke

- Use the JSON provided below.

JSON:
