

# Infinite Scroll

## Problem Name

Inception

## Problem Statement

Implement infinite scrolling in the Material-UI table component.

## Purpose of the Assignment

To learn how to implement infinite scroll

## Details

- Make an API call to <https://picsum.photos/v2/list?page={page-number}&limit={count}> and send page number and count (limit) as parameters
- Trigger API call on scrolling to view the next set of data.
- Display in the form of table

NOTE: Use react-infinite-scroll-component only
